- **Print out Large Format Graphic and Mount**
- **Lamination (Maps, Charts, etc.)**
- **Update/Changing an existing production**
- **Portraits (War College, etc. not ID by MILPO)**
- **Display Boards and other exhibits (AUSA, etc.)**
- **Equipment Operations (Fitch and etc.) - not approved by Steering Committee and recommended move to SLS and inclusion in PWS for special events (i.e. Hall of Fame, etc.)**

Approved and Programmed VI/TS Project Requirements

Approved project requirements based on level of funding available for FY 01 were briefed to the Steering Committee at this meeting. Based on the procurement sensitivity prior to the PWS being released for solicitation, this slide was omitted from posting to the Ft. Huachuca web site.

Any questions about the information presented on this slide should be referred to Mr. John McGovern at X8-2663.

CA Steering Committee Meeting DOIM Issues

- **ISSUE:** Should DOIM's new AT&BSC Div be withdrawn from the study and placed in the RO?
 - Not included in original CPAS, added 01/00 based on DOIM reorganization and DRM request to TRADOC
 - Functions not announced by Congress and primarily contracted now.
 - Analysis concluded to hard to document in the PWS without risk to the core mission of the organization
 - No impact on MEO cost
 - RO/GIN staff responsible to ensure seamless operations in the case of contractor win
- **RECOMMENDATION:** Yes
 - DRM memo to TRADOC stating that our request to add AT&BSC staffing to our CPAS and the functions to the study were based on a DOIM reorganization and based on further analysis were premature, thus we request those numbers be removed and the functions moved to the RO.

CA Steering Committee Meeting DOIM Issues

- ISSUE: Should we document in the PWS and plan for the MEO support in the following areas:
 - Functions never supported
 - DOIM functions added to In/Out Processing checklist (No data)
 - Doctrinal/regulatory functions that haven't been enforced in years
 - CAPR/ITR Processing (No current data)
- RECOMMENDATION:
 - Steering Committee provide guidance/decision so these functions can be included in the PWS

Closing Comments/Questions

- Customer Organization input to PWS critical
 - Functions
 - Levels of support
 - Procurement Sensitive
 - MEO or Contract decision irrelevant
- TRADOC Timelines < Quality PWS
- Future Meetings????
- Questions??????
